

For Immediate Release

MachineryLink Announces Feature Appearance On Syndicated Program, “Eye On America”

Kansas City, MO (May 12, 2008) - MachineryLink, Inc., the leading provider of combine leasing programs to agricultural producers in North America, today announced that the Company will be featured in an upcoming episode of “Eye On America” as part of the show’s America’s Heartland series on Equipping Today’s Farmers for Success.

Equipment ranks second only to land as the most costly necessities of operating a farm in today’s agricultural landscape. The specialized harvest combine is often the most expensive machine on the farm, yet is utilized the least amount of time. Annual harvest windows are relatively predictable, making the case for MachineryLink’s Managed Lease, which provides the combine to the grower for only that harvest window. Compared to the annual costs of depreciation, storage and maintenance, combine ownership is harder to justify when looking at opportunity costs that might be missed by carrying such a large capital expense on the balance sheet.

MachineryLink’s Managed Lease program is tailored to the specific requirements and use period of farmers across North America where customers only pay for the combine while they need it. Cleaned, inspected and certified combines are delivered to the farm in a timely manner, thanks to the Company’s in-house logistics service and its network of more than 200 local equipment dealers throughout North America.

About MachineryLink, Inc.

MachineryLink (www.machinerylink.com) is the leading and fastest growing provider of combine leasing programs to agricultural producers in North America. Its headquarters are in Kansas City, MO, with operational centers in Pratt, KS and N. Sioux City, SD. The company also maintains seasonal service facilities in five locations across the United States. MachineryLink's unique Managed Lease program allows growers to significantly lower their equipment costs by providing the latest harvest technology and equipment with guaranteed delivery and pick-up.
